Multi-Step Problems

Find the variable side. Round the intermediate and final values to the nearest tenth.

1) $e = \underline{\hspace{2cm}}$ cm

2) $m = \underline{\hspace{2cm}}$ cm

3) $t = \underline{\hspace{2cm}}$ cm

4) $a = \underline{\hspace{2cm}}$ cm

Find the area of each triangle. Round the intermediate and final values to the nearest tenth.

5) Area = $\underline{\hspace{2cm}}$ cm^2

6) Area = $\underline{\hspace{2cm}}$ cm^2

Multi-Step Problems

Find the variable side. Round the intermediate and final values to the nearest tenth.

1) $e = \underline{56.4}$ cm

2) $m = \underline{54.9}$ cm

3) $t = \underline{9.1}$ cm

4) $a = \underline{62.1}$ cm

Find the area of each triangle. Round the intermediate and final values to the nearest tenth.

5) Area = $\underline{1745.4}$ cm^2

6) Area = $\underline{835.0}$ cm^2
