One Step Equations BINGO

How to Play

- 1) Provide each student or group a unique bingo card.
- 2) Assign a caller (student or teacher) to read the problems aloud to the class using the caller cards. The caller will shuffle the cards and pick a random question from the box one at a time. Once a caller card is used, place it in a separate box or discard pile.
- 3) Students will write each problem on paper as read by the caller and solve it. If they find their answer on their Bingo card, they may mark it by placing a bingo chip on top of that square.
- 4) The first student or group that covers four or five squares that results to a horizontal, vertical, or diagonal pattern will say "Bingo!" and becomes the winner.

***The teacher should verify the winning card by ensuring that the squares marked by the student are the answers to the problems that had been called out (discard pile).

- 5) To add variety to the game, here are other bingo patterns which you may ask the students to form:
