GIRL AND A SOLDIER, PALESTINE

This photo was taken on the wall that separates Palestine and Israel. The wall symbolises the conflict between the two

countries. The photo shows a girl on the left and a soldier on the right standing with his hands against the wall. A rifle is leaning against the wall next to the girl. What is really unexpected in this painting is that the girl is searching the soldier and not the other way round.

VIRTUAL PLAY, LOS ANGELES

This picture shows two children playing together with a ball. The odd thing is that the ball is not real. Between the two children, at the top, there is a TV set and the ball is pictured on the screen.

Match the descriptions to the pictures. Look at the board for the titles and write it under the right picture.

LOOTERS, NEW ORLEANS

This photo was taken in Louisiana after the hurricane Katrina destroyed a large part of the city of New Orleans. The photo

shows a window in the background and in the foreground two men dressed as soldiers are getting out of the window carrying a TV set. On the right of the two men there is a trolley filled with stolen items such as a stereo.

TOXIC

This photo shows a rat painted on a wall located at a street corner. This rat is spilling a green liquid on the street. This liquid seems to be extremely dangerous because it is coming out of a toxic barrel.

CAVE PAINTING

This photo shows a man carrying a pressure washer. Around him you can see prehistoric paintings and we suppose he is

standing in a cave. This man is wearing a cap and an orange safety vest, he probably works for the city of London. What is really surprising in this picture is that the man is removing these prehistoric paintings like they were graffiti. It is a shocking picture and the message is very clear: ask yourself this question, is street art, art or vandalism

DOVE, PALESTINE

This photo was also taken in Palestine on the wall that separates it from Israel. What we can see is a dove, the symbol of peace, wearing a bullet proof jacket. The dove is being targeted and there is a red sight painted in the middle of the bullet proof jacket.
