

# WHAT ARE THE RISKS IN VEIN TREATMENT?

Varicose veins are veins that get huge and start being in red, blue, or other colors. They appear bad on the skin like enlarged and swollen. Frequently they easily noticeable from the skin surface. They are most likely to be seen around the ankle, calves, and thighs. Spider veins are smaller than its counterpart like spider veins. They also do not swell and expand as much as a varicose vein. They might seem like the spiderwebs with their jagged lines. They are seen commonly on the face and legs. irrespective of where they can be seen you shall get the treatment from the vein treatment near me.

## **What are the main reasons for spider and varicose veins?**

Varicose veins can be related to the damaged valves and it requires the attention of the vein doctor Clifton. The heart pumps blood supplied with oxygen and nutrients to the whole body and enriches everything with nutrition. Veins then move the blood and make your organs work and breathe. The reason behind this problem is sex, age, hormonal imbalance, and obesity. Whatever is your issue consulting the vein treatment in NJ can be the best thing.

## **What Are The Best Alternatives To Spider Vein and Varicose Vein Treatment?**

### **SCLEROTHERAPY**

Sclerotherapy is the most common that is regarded as the best option for taking care of any vein issue. The doctor uses an injection to stir the problem through and conceal your vein. The chemical leads the vein walls to swell, stick together, and seal shut. This interrupts flow of blood, and the vein turns into scar tissue. In a period of some days, the vein should fade.

This treatment does not require anesthesia and can be done in your doctor's office. You can return to normal activity right after treatment. The same vein may need to be treated even the particular cause is not obvious. Veins treatment supposed to be taken in the duration of 4 to 6 weeks. You may be supposed to wear a compression hose after sclerotherapy to assist with healing and decrease inflammation. This treatment is very useful when done perfectly. You can explore [vein treatment Paramus](#) for the options that can help you the best.

### **What are the major side effects:**

Stinging, red, and irregular lines on the skin, or bruises you can say the marking of injection. These things normally get better after few days of treatment. You can consult the vein treatment near me Paramus for bettering the condition. Spots, brown lines, or clusters of little red blood vessels accumulated around the encompassing area. These usually go away after some practice.

### **SURFACE LASER TREATMENTS**

In some instances, laser vein treatments can definitely treat spider veins and little varicose veins. This method sends very strong bursts of light that will after some while shrink your veins and those get dissolved in your body. This leads your veins to slowly fade and disappear. Not all skin types and colors are suitable for having the laser treatment.

No needles or incisions are great because no needles and injections are used, but the heat from the laser is not something easy. Cooling aftercare can reduce inflammation. Laser vein treatments could be for 15 to 20 minutes. Commonly, 2 to 5 laser vein treatments are needed to eliminate spider veins in the legs.
